The Law of Freedom of Information is the standard textbook on this subject. The first edition was published to coincide with the coming into force of the Freedom of Information Act 2000, and its comprehensive, analytical approach provided the complete reference work for practitioners advising on the legislation; those working within or advising the myriad public bodies upon which the Act imposes new duties regarding the disclosure and handling of information; those advising clients with a personal, professional or commercial interest in obtaining information from those newly obliged to provide it; and those in the business community for whom the Act raises important concerns about the potential accessibility of commercially sensitive information.
