THE INDISPENSABLE COMPANION FOR THE PRACTISING COMPETITION LAWYER

## Journal of European Competition Law & Practice

Editors: **Paul Nihoul**, University of Louvain and **Thomas Lübbig**, Freshfields Bruckhaus Deringer LLP, Berlin

*"Oxford University Press's commitment to competition law is well known and its catalogue is unrivalled in its authority and consistently high quality. I fully expect this new journal to further that legacy and become a leader in the field."*

JONATHAN FAULL, DIRECTOR GENERAL, EUROPEAN COMMISSION

- Primarily focused on EU competition law
- Includes the full range of substantive competition law topics, and practice-related matters such as litigation and enforcement
- Combines the highest standards of legal analysis with concise presentation and practice-relevance

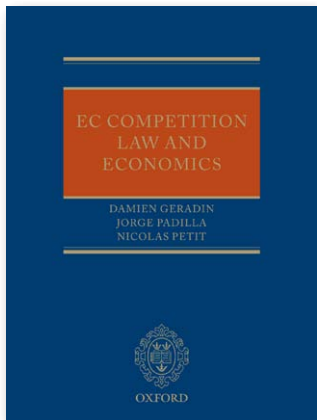

Published bi-monthly, and primarily focused on EU competition law, *Journal of European Competition Law & Practice* is a peer-reviewed journal dedicated to the practice of competition law in Europe. Coverage includes the full range of substantive competition law topics as well as practice-related matters such as litigation and enforcement. The journal takes a broad approach, setting competition law in the context of EU law, and looking at its application to, and impact on, related areas of law and industry sectors.

It combines the highest standards of legal analysis with concise presentation and practice-relevance. The journal is specifically designed for EU Competition lawyers both in private practice and working in industry and the corporate sector.

It is likely also an essential source of reference for domestic lawyers in EU countries, non-competition-specialist lawyers, members of the judiciary, officials in enforcement agencies and regulatory bodies, and academics specialising in competition /antitrust.

## EU Competition Law and Economics

**Damien Geradin**, Partner, Covington & Burling LLP & Professor of Competition Law and Economics, Tilburg University, member of TILEC, **Dr Anne Layne-Farrar**, Vice President, Compass LexEcon, and **Nicholas Petit**, Professor of Competition Law and Economics, University of Liege

- The first EU competition law treatise to fully integrate economic reasoning in its treatment of European Commission decisions and the case-law of the European Court of Justice
- Written in an accessible way by two expert competition law practitioners and academics and a prominent economic consultant
- Facilitates understanding of the practical implications of economics for competition law by fully integrating the economic discussion and the legal analysis

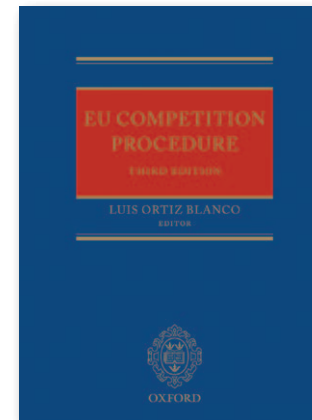

This is the first EU competition law treatise that fully integrates economic reasoning in its treatment of the decisional practice of the European Commission and the case-law of the European Court of Justice.

Ensuring a genuinely integrated approach to legal and economic analysis, this major new work is written by a team combining the widely recognised expertise of two competition law practitioners and a prominent economic consultant. The book contains economic reasoning throughout in accessible form, and, more pertinently for practitioners, examines economics in the light of how it is used and put to effect in the courts and decision-making institutions of the EU. A general introductory section sets EU competition law in its historical context. The second chapter goes on to explore the economics foundations of EU competition law. What follows then is an integrated treatment of each of the core substantive areas of EU competition law, including Article 101 TFEU, Article 102 TFEU, mergers, cartels and other horizontal agreements, vertical restraints and technology transfer agreements.

### Readership:

This book will appeal to practitioners and academics specialising in competition law but will also be of interest to economists working in the field and non specialist commercial practitioners.

- Comprehensive analytical commentary on the procedural rules of EU Competition Law
- Exhaustive coverage of the case law and doctrine in a user-friendly layout and format
- Reliable and easy-to-consult source of information written by experts familiar with the practical aspects of the relevant procedures

A key analytical commentary on the competition procedures of the EC, this work is written by a distinguished author team with extensive experience in the area. Providing comprehensive analysis of the entire set of applicable procedural rules under European competition law, the work is fully updated to reflect developments in the legislation and a wealth of recent new case law, in particular in relation to merger control and state aid. Consideration is given as to how EC Regulation 1/2003 (antitrust rules) have been applied and reviews their enforcement. The third edition also considers the fining practice of the European Commission and the judicial review of this practice by the Community Courts. As a practical guide to procedure, it focuses upon the implementation of the regulatory framework by the Commission and the relevant case law of the European Courts. It will prove an indispensable source of guidance for all practitioners involved in competition proceedings before the European Commission and national competition authorities.
