

Judicial Review: Principles and Procedure

Jonathan Auburn; Jonathan Moffett; Andrew Sharland, Barristers, 4-5 Gray's Inn Square

Consultant editor: Richard McManus QC, Barrister 4-5 Gray's Inn Square

- A substantial new work covering the procedural issues and substantive law involved in bringing and defending claims for judicial review
- Carefully structured to provide comprehensive and practical analysis of each issue of relevance and each problem which may be encountered
- Includes detailed treatment of emerging grounds of review, such as delay, as well as all the latest developments in procedural fairness and national security
- Written by a team of leading barristers from 4-5 Gray's Inn Square, with a contribution on EU law from Marie Demetriou from Brick Court Chambers

Covering all of the substantive grounds on which a claim may be brought, this significant new work provides unrivalled analysis and advice on the law of judicial review. Each element of this complex area of law has been carefully broken down to ensure that answers are always easy to find; the book includes chapters on the most common grounds for bringing a claim, such as procedural fairness and irrationality, but also covers in detail more discrete and emerging grounds such as legitimate expectation and error of fact. Thorough and up-to-date reference to case law is included throughout and the jurisprudence arising out of the Human Rights Act 1998 has been fully incorporated to provide the reader with a complete and practical treatment of each relevant topic. The book also contains comprehensive treatment of procedural matters in each stage of a claim, from pre-action, to costs. Where the law is in doubt, the dispute is concisely stated and the view most likely to be preferred by the courts is expressed.
