

NEW EDITION

Thomas on Powers

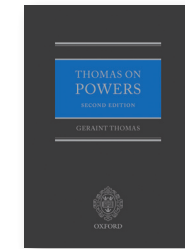

Geraint Thomas, Professor of Equity and Property Law, Queen Mary, University of London

- A fully updated and expanded edition of this leading practitioner text on the use of powers
- Includes full coverage of case law and legislation in offshore jurisdictions
- Analyses recent trusts developments such as sham trusts, the role of protectors, and fiduciary powers

Highly regarded, and cited in a number of judgments in England and Australia, *Thomas on Powers* is concerned with the general principles and doctrines governing or affecting the creation, exercise and operation of powers in private law, and provides a discursive intellectual analysis of the principles underlying the problems commonly encountered by practitioners. This new edition both updates the original work and expands the scope of the book significantly to include coverage of offshore trusts and current trusts issues such as fiduciary powers, protectors, and "shams".

Review from previous edition

"Comprehensive and unique...the first edition of an important new book that is highly recommended for equity practitioners."
