

BIOGRAPHY

Joseph E. Stiglitz

Joseph E. Stiglitz is University Professor in Economics at Columbia University in New York and Co-President of the IPD (Initiative for Policy Dialogue). He was recently appointed Chair of the Brooks World Poverty Institute, University of Manchester. In 2001, Professor Stiglitz was awarded the Nobel Prize in Economics. From 1995–1997, he served as Chairman of the U.S. Council of Economic Advisers and as a member of President Clinton’s cabinet. From 1997 to 2000, he was the World Bank’s Senior Vice President for Development Economics and Chief Economist. His prior academic appointments include professorships at Yale, Princeton, Stanford, and Oxford Universities.

Selected Works of Joseph E. Stiglitz

Volume I: Information and Economic Analysis

Joseph E. Stiglitz, Columbia University

The first in a series of six volumes containing a selection of Joseph Stiglitz’s most important and widely cited work, this volume includes a number of seminal papers on the economics of information. The volume contains substantial additional original commentary by Joseph Stiglitz on his work and the field more generally.

Education for All Global Monitoring Report 2008

Education for All by 2015. Will We Make It?

United Nations Educational, Scientific and Cultural Organization (UNESCO)

The sixth edition of this global report marks the midterm point and provides a rich evidence-based assessment of progress towards expanding early childhood learning programmes, reaching universal primary education, achieving gender equality at all levels of education, dramatically reducing adult illiteracy, and improving educational quality.

Education for All Global Monitoring Report 2009

Overcoming Inequality - Why Governance Matters

United Nations Educational, Scientific, and Cultural Organization (UNESCO)

Gaping inequalities confront education today. Simply put, not all children have access to a good quality education and large numbers of youth and adults are excluded from participation in their societies. Deeply entrenched disparities based on wealth, gender, ethnic or cultural belonging, disability and geographical residence represent tall obstacles to achieving Education for All, a set of six goals to which over 160 governments committed themselves in 2000.

Overcoming inequality—why governance matters is the seventh edition of the *Education for All Global Monitoring Report*. It maps the complex and multiple facets of inequality and examines some of the key questions that national governments and donors must address in attempting to ensure that the benefits of education are shared by the poor, disadvantaged groups and regions that are being left behind. It shows that public policy and governance reform, together with sustained financial commitment, can break the cycle of disadvantage, improve access, raise quality and enhance participation and accountability.

Prepared by an independent team of researchers based at UNESCO, this report is based on case studies, commissioned research and extensive data analysis relating to early childhood care and education programmes, primary and secondary education, gender, life skills, adult literacy and quality. It includes an analysis of aid to basic education, crucial to supporting educational development, especially in fragile states, where conflict and weak governance have severely undermined the provision of education.

Contours of the World Economy 1–2030 AD

Essays in Macro-Economic History

Angus Maddison, University of Groningen

Written by a pioneer in the quantitative and macroeconomic analysis of economic history, this book combines qualitative histories with quantitative data. It also seeks a new understanding of the forces of economic growth and development by taking the ultimate long view—the whole of the last millennium—and looking to the future.

Does Foreign Aid Really Work?

Roger C. Riddell, Oxford Policy Management, and Principal, The Policy Practice

‘Essential reading for anyone interested in the subject of aid and wishing to be informed about the issues involved.’

Nigel Grimwade, Times Higher Education Supplement

Provided for over 60 years, and expanding more rapidly today than it has for a generation, foreign aid is now a \$100bn business. But does it work? Indeed, is it needed at all? In this first-ever, overall assessment of aid, Roger Riddell provides a rigorous but highly readable account of aid, warts and all.

Gender, Greed, and Lust

A History of Economic Ideas

Nancy Folbre, University of Massachusetts Amherst

This book dramatizes the history of self interest by describing a centuries-long debate over greed, lust, and appropriate gender roles in terms that ordinary readers will enjoy. Ranging from the 18th century to the present, it offers a deft and engaging critique of famous economists such as Adam Smith, John Maynard Keynes and Gary Becker and emphasizes the insights of feminist thinkers such as Harriet Martineau, Elizabeth Cady Stanton, and Charlotte Perkins Gilman. Rather than focusing simply on wage inequality between men and women, it celebrates early efforts to challenge the sexual double standard and to appreciate the important but economically invisible work of mothers.

Fixing Failed States

Ashraf Ghani and Clare Lockhart, both Institute of State Effectiveness

'Ashraf Ghani has held one of the toughest jobs on earth: the Finance Minister responsible for the reconstruction of Afghanistan. This experience grounds the analysis of failed states in a rare sense of realism. Here, he and Clare Lockhart cover the full array of problems that beset failed states, which range far beyond the conventional remit of development agencies.'

Paul Collier, author of *The Bottom Billion*

'This book is an important and timely alarm bell for the world's next crisis—and proves that no one knows more about how states function (and don't) than Ghani and Lockhart. We ignore their remedies at our peril.'

Hernando de Soto, author of *The Mystery of Capital: Why Capitalism Triumphs in the West and Fails Everywhere Else*

Fixing Failed States addresses one of the central issues of our times: the proliferation of failed states across the world and our inability to stabilize them. There are between forty and sixty failed states, and they house one billion people. The world's worst problems—terrorism, drug and human trafficking, absolute poverty, ethnic conflict, disease, genocide—originate in such states, and the international community has devoted billions upon billions of dollars to solving the problem. Yet by and large, the effort has failed. Written by two of the world's foremost experts on the subject, the book does not simply describe the issue—it explains why our solutions have not worked and presents a compelling, doable agenda for addressing this most pressing of global crises.

BIOGRAPHY

Graciana del Castillo

Graciana del Castillo, an expert in economic reconstruction in countries coming out of war or other chaos, was the first senior economist in the Cabinet of the UN Secretary-General in the early 1990's, involved in ongoing post-conflict operations in Central America, Asia, and Africa. She continued work on countries at war or post-conflict at the IMF, participated in jump-starting Kosovo's economy, and moderated a major donors' meeting on Timor-Leste in Prague. She was a director at S&P's and the Centennial Group, a senior consultant to the Inter-American Development Bank, a visiting scholar at the OECD Development Center, and a participant in USAID bids for reconstruction projects in Afghanistan and Iraq. She is a founding partner of the Macroeconomic Advisory Group. With a Ph.D. in Economics from Columbia University (1986), she has been Adjunct Professor there since 1990. Her articles have appeared in top economic and political journals and newspapers worldwide.

Rebuilding War-Torn States

The Challenge of Post-Conflict Economic Reconstruction

Graciana del Castillo, Director, Centennial Group and Columbia University

The wide exposure that countries such as Afghanistan, Iraq, Kosovo, Timor Leste and many others in Africa in the transition to peace receive in the media, has increased the public's interest in post-conflict countries. According to the UN, these countries have a fifty-fifty chance of reverting to war. Effective post-conflict economic reconstruction is needed to avoid this reversal and ensure long-lasting peace.

Although all countries in post-conflict situations since the end of the Cold War have been at low levels of development, economic reconstruction is not 'development as usual'. This is because there is a need to reconstruct war-ravaged countries and transform them into viable, employment-creating economies, amid the political, security and social vulnerabilities and constraints that characterize the transition to peace. This means that optimal economic policies are not always achievable or even desirable. Countries in the transition to a tenuous peace need to give priority to public security, the rule of law, participatory government and national reconciliation. This book discusses possible strategies for post-conflict economic reconstruction that could ensure a successful transition to peace.

Economics

A Very Short Introduction

Partha Dasgupta, University of Cambridge

'The text is direct, rigorous and thought-provoking. It provides an intelligent, rigorous and readable introduction to economics.'

London Book Review.com

Economics has the capacity to offer us deep insights into some of the most formidable problems of life, and offer solutions to them too. Combining a global approach with examples from everyday life, Partha Dasgupta describes the lives of two children who live very different lives in different parts of the world: in the Mid-West USA and in Ethiopia. He compares the obstacles facing them, and the processes that shape their lives, their families, and their futures. He shows how economics uncovers these processes, finds explanations for them, and how it forms policies and solutions.

Greening Aid?

Understanding the Environmental Impact of Development Assistance

Robert L. Hicks, The College of William and Mary, Bradley C. Parks, the Millennium Challenge Corporation, J. Timmons Roberts, The College of William and Mary, and Michael J. Tierney, The College of William and Mary

'*Greening Aid?* represents an enormous step forward in our understanding of environmental aid. The authors use their extensive new database to support, and overturn, a variety of conjectures about patterns of aid. They demonstrate that aid was "greened" during the last two decades of the 20th century, indicate that environmental protection was one of the motivations of donors, and show some surprising differences between bilateral and multilateral aid. *Greening Aid?* is a major work of scholarship.'

Robert O. Keohane, Princeton University

Every year, billions of dollars of environmental aid flow from the rich of the North to the poor of the South. Why do donors provide this aid? What do they seek to achieve? What explains the patterns of environmental aid spending—is it designed to address real problems, achieve geopolitical or commercial gains abroad, or buy political mileage at home? And does it always go to the places of greatest environmental need? This groundbreaking text is based on the authors' work compiling and evaluating the environmental impact of over 400,000 development projects by more than 50 donors to over 170 recipient nations. *Greening Aid?* explains major trends over the last decades, ranks donors according to their performance, and offers case studies which contrast donors and types of environmental aid.

BIOGRAPHY

Amartya Sen

Amartya Sen is Lamont University Professor, Professor of Economics and Philosophy at Harvard University and was until recently the Master of Trinity College, Cambridge. He has served as President of the Econometric Society, the Indian Economic Association, the American Economic Association and the International Economic Association. He was formerly Honorary President of OXFAM and is now its Honorary Advisor. Born in Santiniketan, India, Amartya Sen studied at Presidency College in Calcutta, India, and at Trinity College, Cambridge. He is an Indian citizen. He was also previously Lamont University Professor at Harvard from 1988–1998, and prior to that he was the Drummond Professor of Political Economy at Oxford University, and a Fellow of All Souls College (he is now a Distinguished Fellow of All Souls). He has also been a Professor of Economics at Delhi University and at the London School of Economics.

Amartya Sen's books have been translated into more than thirty languages and his research has ranged over a number of fields in economics, philosophy, and decision theory, including social choice theory, welfare economics, theory of measurement, development economics, public health, gender studies, moral and political philosophy, and the economics of peace and war.

Arguments for a Better World: Essays in Honor of Amartya Sen

Edited by **Kaushik Basu**, C. Marks Professor of International Studies and Professor of Economics and Director, Center for Analytic Economics, Cornell University, and **Ravi Kanbur**, T.H. Lee Professor of World Affairs, Cornell University

Amartya Sen has made deep and lasting contributions to the academic disciplines of economics, philosophy, and the social sciences more broadly. He has engaged in policy dialogue and public debate, advancing the cause of a human development focused policy agenda, and a tolerant and democratic polity. This argumentative Indian has made the case for the poorest of the poor, and for plurality in cultural perspective.

Foundations of Economics

Andrew Gillespie, Head of Business Studies and Accounts, d'Overbroeck's College, Oxford. Visiting lecturer, Oxford Brookes University, Oxford

suitable as a student text

Assuming no prior knowledge of economics, this exciting new text focuses on the basic principles of micro and macroeconomics, giving the reader the tools to analyse any economic situation. The book is filled with topical examples that bring the subject to life, helping to show the relevance of economics to real life situations such as why house prices are so high in the UK or the benefits of spending an extra hour on an assignment.

NEW EDITION

Economics

suitable as a student text

ELEVENTH EDITION

Richard Lipsey, Simon Fraser University, Canada, and **Alec Chrystal**, Sir John Cass Business School, London

The eleventh edition of this successful textbook for students of Economics has been thoroughly updated and revised to give more depth to core principles. Pitched at a level that will stretch readers but still comprehensible for beginners, Economics is explained in a straightforward manner, while maintaining the rigour needed to enable students to progress with their studies.

A supporting and newly expanded Online Resource Centre features updates for lecturers including an instructor's manual; PowerPoint slides; answers to questions in the text; class exercises; and artwork from the text. Supplements for students include self-assessment multiple choice questions with feedback; crosswords compiled from key glossary terms; a list of useful websites; maths appendices; past exam papers and additional case studies.

THE OXFORD HANDBOOKS IN ECONOMICS AND FINANCE

The new Oxford Handbooks in Economics and Finance Series will map the key sub disciplines and topics within economics and finance. The aim is to bring together the leading, international figures in a particular field to provide academics, researchers, graduate students and policy makers with an accessible account of the major issues and research in their field as well as a discussion of possible future developments in the field.

The Oxford Handbook of Economic Inequality

Edited by **Wiemer Salverda**, University of Amsterdam, and Coordinator of the European Low-wage Employment Research network LoWER, and **Brian Nolan**, Economic and Social Research Institute ESRI and Network of Excellence EQUALSOC, and **Timothy M. Smeeding**, Maxwell School, Syracuse University, and Luxembourg Income Study LIS

The *Oxford Handbook of Economic Inequality* presents a new and challenging analysis of economic inequality, focusing primarily on economic inequality in highly developed countries. Bringing together the world's top scholars this comprehensive and authoritative volume contains an impressive array of original research on topics ranging from gender to happiness, from poverty to top incomes, and from employers to the welfare state. The authors give their view on the state-of-the-art of scientific research in their fields of expertise and add their own stimulating visions on future research. Ideal as an overview of the latest, cutting-edge research on economic inequality, this is a must have reference for students and researchers alike. The volume also links to a website full of further reading and methodological annexes to assist with further research in the field.

Part 1: Inequality: Overview, Concepts and Measurement

- 1 Introduction: The scope and worries of economic inequality by *Brian Nolan, Wiemer Salverda and Timothy M. Smeeding*
- 2 Concepts and theories of inequality by *John E. Roemer*
- 3 The measurement of economic inequality by *Stephen Jenkins and Philippe van Kerm*

Part 2: The Extent of Inequality

- 4 Income inequality by *Andrea Brandolini and Timothy M. Smeeding*

- 5 Functional and personal distribution by *Andrew Glyn*
- 6 Wealth and economic inequality by *James B. Davies*
- 7 High incomes and inequality by *Andrew Leigh*

Part 3: Earnings inequality

- 8 Inequality and earnings distribution by *Francine D. Blau and Lawrence M. Kahn*
- 9 Inequality and the labour market: employers by *Julia Lane*
- 10 Inequality and the labour market: unions by *Jelle Visser and Daniele Checchi*
- 11 Low pay by *Claudio Lucifora and Wiemer Salverda*
- 12 Gender and economic inequality by *Mary B. Gregory*

Part 4: Dimensions of inequality

- 13 Inequality, poverty and exclusion by *Brian Nolan and Ive Marx*
- 14 Inequality, consumption and time use by *Nancy Folbre*
- 15 Inequality and happiness by *Bernard van Praag and Ada Ferrer-i-Carbonell*
- 16 Health and economic inequalities by *Andrew Leigh, Christopher Jencks and Timothy M. Smeeding*
- 17 Inequality and education by *Stephen Machin*

Part 5: The Dynamics of Inequality

- 18 Demographic transformation and economic inequality by *Gary Burtless*
- 19 Migration, ethnicity and economic inequality by *Klaus Zimmermann and Martin Kahanec*
- 20 Intergenerational economic inequality by *Anders Bjorklund and Markus Jantti*
- 21 Intragenerational inequality and intertemporal mobility by *Richard V. Burkhauser and Kenneth A. Couch*

Part 6: Global perspectives on inequality

- 22 Inequality, growth and sectoral change by *Sarah Voitchovsky*
- 23 Trade, skills and globalization by *Richard B. Freeman*
- 24 Poverty and inequality: The global context by *Francisco H.G. Ferreira and Martin Ravallion*

Part 7: Can inequalities be changed?

- 25 Economic inequality and the welfare state by *Gøsta Esping-Andersen and John Myles*
- 26 Inequality and policy making by *Nolan McCarty and Jonas Pontusson*
- 27 Prospects for achieving equality in market economies by *John E. Roemer*

The Oxford Handbook of Banking

Edited by **Allen N. Berger**, the Moore School of Business, University of South Carolina, Wharton Financial Institutions Center, **Phillip Molyneux**, Bangor Business School, and **John Wilson**, University of St Andrews

The *Oxford Handbook of Banking* provides an overview and analysis of state-of-the-art research in banking written by leading researchers in the field. This handbook will appeal to graduate students of economics, banking and finance, academics, practitioners and policy makers. Consequently, the book strikes a balance between abstract theory, empirical analysis, and practitioner and policy-related material.

The handbook is split into five parts. Part I, The Theory Of Banking, examines the role of banks in the wider financial system, why banks exist, how they function, and their legal and governance structures. Part II entitled Regulatory and Policy Perspectives discusses monetary policy, prudential regulation and supervision, and antitrust policy. Part III of the book deals with bank performance. A number of issues are assessed including efficiency, financial innovation and technological change, globalization and ability to deliver small business, consumer, and mortgage lending services. Part IV of the book provides an overview of macroeconomic perspectives in banking. This part of the book includes a discussion of the determinants of bank failures and crises, and the impact on financial stability, institutional development, and economic growth. Part V examines international differences in banking structures and environments, focusing in particular on the banking systems in the United States, Western Europe, transition countries, Latin America, Japan and the developing nations of Asia.

- 1 Banking: An introduction by *Allen Berger, Phil Molyneux & John O.S. Wilson*

Part I: The Theory of Banking

- 2 The roles of banks in financial systems by *Franklin Allen and Elena Carletti*
- 3 The accelerating integration of banks and markets and its implications for regulation by *Arnoud Boot and Anjan Thakor*
- 4 Risk management in banking by *Linda Allen and Anthony Saunders*
- 5 Liquidity production in 21st century banking by *Philip Strahan*
- 6 Diversification in banking by *Kevin Stiroh*
- 7 Universal banking by *Alan Morrison*
- 8 The corporate structure of international financial conglomerates: Complexity and its implications for safety and soundness by *Richard Herring and Jacopo Carmassi*

Part II: Regulatory and Policy Perspectives

- 9 Central banking by *Michel Aglietta and Benoit Mojon*
- 10 Monetary transmission and bank lending by *Joe Peek and Eric Rosengren*
- 11 Lender of last resort and bank closure policy by *Xavier Freixas and Bruno Parigi*
- 12 Regulation and supervision by *Edward Kane*
- 13 Deposit insurance by *George G. Kaufman and Robert A. Eisenbeis*
- 14 Risk-based regulatory capital and Basel II by *Michael Gordy and Erik Heitfield*
- 15 Market discipline in bank supervision by *Mark J. Flannery*
- 16 Competition and antitrust policy in banking by *Astrid Dick and Timothy Hannan*
- 17 WTO commitments versus reported practices on foreign bank entry and regulation: A cross country analysis by *James R. Barth, Juan Marchetti, Daniel Nolle and Wanvimot Sawanggoenyuang*

Part III: Bank Performance

- 18 Efficiency in banking: Theory, practice, And evidence by *Joe Hughes and Loretta Mester*
- 19 Technological change, financial innovation, and diffusion in banking by *W. Scott Frame and Lawrence J. White*
- 20 Banking globalization: International consolidation and mergers in banking by *Claudia Buch and Gayle DeLong*
- 21 Small business lending by *Allen N. Berger*
- 22 Consumer lending by *Tom Durking and Gregory Elliehausen*
- 23 Mortgage lending by *Andreas Lehnert*

Part IV: Macroeconomic Perspectives

- 24 Systemic risk in banking: An update by *Philipp Hartmann, Oliver de Bandt and Jose-Luis Peydro-Alcalde*
- 25 Banking Crises by *Gerard Caprio and Patrick Honohan*
- 26 Bank failures, The Great Depression and other contagious events by *Charles Calomiris*
- 27 Payments systems by *David Humphrey and James McAndrews*
- 28 Finance and economic development: The Role of Government by *Asli Demirguc-Kun*
- 29 Banking and real economic activity by *Nicola Cetorelli*

Part V: International Differences in Banking Structures and Environments

- 30 Banking in the United States by *Robert DeYoung*
- 31 Banking in the EU-15 Countries by *John Goddard, Phil Molyneux and John O.S. Wilson*
- 32 Banking in transition countries by *John Bonin, Iftekhar Hasan, and Paul Wachtel*
- 33 Banking in Latin America by *Jonathan Williams, Fernando Carvalho and Luiz de Paula*
- 34 Banking in Japan by *Hirofumi Uchida and Gregory Udell*
- 35 Banking in developing nations of Asia: An overview of recent changes in ownership structure by *Leora Klapper, Maria Soledad Martinez-Peria and Bilal Zia*
