

## The Entrepreneurial Society

**David B. Audretsch**, Max Planck Institute of Economics and Indiana University

'With insight and clarity, Audretsch describes the sweeping transformation of the American economy over the past two decades. Adroitly weaving together social, economic, and cultural changes, he chronicles the demise of the bureaucratic 'managed' economy. The dawn of the entrepreneurial society' in its place carries far-reaching consequences, and Audretsch's book serves as an important guide to exploring them.'

Carl J. Schramm, President and CEO, The Kauffman Foundation

While the previous generation had an average of four employers over a lifetime, the current generation will hold four different jobs by 30. You can either take a job or, by becoming an entrepreneur, create jobs for others, which good for individuals, and also the link to growth in a global economy. Welcome to the entrepreneurial society.

## International Competitiveness and Knowledge-based Industries in India

**Nagesh Kumar**, Research and Information Systems for Developing Countries

This volume analyses the factors that can make knowledge-based industries in India competitive in the global markets and provides policy recommendations. The analysis is complemented by detailed industry studies of five knowledge-based industries—electronics, non-electrical machinery, automobiles, pharmaceuticals, and chemicals—to determine their export competitiveness.

## The Oxford Handbook of Entrepreneurship

**Mark Casson**, University of Reading, **Bernard Yeung**, Stern School of Business, New York University, **Anuradha Basu**, Lucas Graduate School of Business, San Jose State University, and **Nigel Wadson**, University of Reading

A comprehensive review of state-of-the-art research in Entrepreneurship,

written by an international team of leading scholars. Entrepreneurship has been a dynamic and expanding area of research over the last twenty years, but there has been no standard reference work for both established scholars and new researchers. This book fills that gap.

## The Management of Technological Innovation

**Mark Dodgson**, University of Queensland Business School, **David M. Gann**, Imperial College, London, **Ammon Salter**, Imperial College, London

The Management of Technological Innovation (MTI) is one of the most important challenges facing businesses today. Innovation has become the fundamental driver of competitiveness for firms of all sizes in virtually all business sectors and nations. The first edition of this book has become one of the most popular texts for students of innovation and technology management. This new edition sees David Gann and Ammon Salter join Mark Dodgson as authors, drawing on their combined experience of 60 years of researching and teaching MTI. It combines the most relevant theoretical analysis with contemporary and historical empirical evidence to provide a comprehensive, yet concise and readable, guide to the challenges of MTI.

## The Economics of the European Patent System

*IP Policy for Innovation and Competition*

**Dominique Guellec**, OECD, and **Bruno van Pottelsberghe de la Potterie**, European Patent Office and Université Libre de Bruxelles

Why does society allow, or even encourage, private appropriation of inventions? When do patents encourage competition, when do they hamper it? These questions and many more are addressed by two eminent scholars in this groundbreaking analysis of the economic foundations of the European patent system.

## Open Innovation

*Researching a New Paradigm*

**Henry Chesbrough**, Haas School of Business, UC Berkeley, **Wim Vanhaverbeke**, Associate Professor, Eindhoven University of Technology, the Netherlands, and **Joel West**, College of Business, San José State University

Henry Chesbrough and his collaborators investigate the phenomenon of 'Open Innovation', in which firms draw on research and development outside their own boundaries. The book's contributors link the practice of open innovation to the established body of innovation research, showing what's new and what's familiar in the process.

## Explorations in Information Space

*Knowledge, Agents, and Organization*

**Max H. Boisot**, Birmingham Business School, University of Birmingham, and The Wharton School, University of Pennsylvania, **Ian C. MacMillan**, the Wharton Entrepreneurial Research Center, and The Wharton School, University of Pennsylvania, and **Kyeong Seok Han**, School of Business Administration, Soongsil University, Korea

'In a beautifully written collection of essays, Max Boisot develops his thinking on the intertwined concepts of space, time and knowledge. He is one of those rare authors who can speak lucidly and authoritatively across disciplinary boundaries. ... recognizing the increasing importance of knowledge in modern economies, Boisot develops a challenging theoretical framework that provides invaluable insights about the world in which we live.'

Geoff Hodgson, Research Professor in Business Studies at the University of Hertfordshire

With the rise of the knowledge economy, the knowledge content of goods and services is going up just as their material content is declining. Economic value is increasingly seen to reside in intangible assets, rather than material. This book explores the framework of 'I-Space'—a theoretical approach to the production and distribution of knowledge.
