

IZA PRIZE IN LABOR ECONOMICS SERIES

The IZA Prize in Labor Economics is today considered one of the most prestigious international awards in the field. It aims to stimulate further research on topics that have enormous implications to our future. All prize-winners contribute a volume to the IZA Prize in Labor Economics series, which has been established to provide an overview of the laureates' most significant findings.

Jacob Mincer

A Founding Father of Modern Labor Economics

Pedro N. Teixeira, Assistant Professor at the Department of Economics of the University of Porto

The first in a series of books published with the IZA, this book presents and analyzes the work of one of the most important economists of the 20th century—Jacob Mincer. Mincer's work has had a lasting influence on contemporary labor economics in both theoretical and methodological terms. Mincer played a central role in shaping contemporary labor economics, not the least by largely determining its research agenda. His work in the 1960s and 70s on the determinants of individual earnings, notably human capital, and on labor force supply, particularly female participation, have had an enormous impact on the way others have approached labor economics. This book presents a systematic analysis of his extensive published work, emphasizing its continuity as a lifetime research program that has made a lasting influence on modern labor economics.

RODOLFO DEBENEDETTI FOUNDATION TITLES

The objective of the Fondazione Rodolfo DeBenedetti is to promote applied and policy oriented research. This includes a focus on the public pension systems, European unemployment, social and immigration policies in the European Union, the dynamics of poverty and inequalities, and their impact on welfare systems.

Working Hours and Job Sharing in the EU and USA

Are Europeans Lazy? Or Americans Crazy?

Edited by **Tito Boeri**, Bocconi University, Milan, **Michael Burda**, Humboldt University Berlin, and **Francis Kramarz**, CREST-INSEE and Ecole Polytechnique

Why do Europeans work so little compared to Americans? Can they be induced to work more without reducing labour productivity? If so, how? This volume explores these questions and many more in order to understand the changing nature of the hours worked in the USA and EU, as well as the effects of policies that impose working hour restrictions.

Education and Training in Europe

Edited by **Giorgio Brunello**, University of Padua, **Pietro Garibaldi**, Fondazione Rodolfo DeBenedetti and University of Turin, and **Etienne Wasmer**, Université du Québec à Montréal

Europe is one of the richest and most educated areas of the world, yet it faces low economic growth, structural difficulties in the labour market, and stiff international competition. This book looks at the current state of play in education and training in Europe and asks what policies are necessary to ensure Europe can meet future labour demands.

Structural Reforms Without Prejudices

Edited by **Tito Boeri**, Bocconi University and Fondazione Rodolfo DeBenedetti, **Micael Castanheira**, Université Libre de Bruxelles, **The Late Riccardo Faini**, Università degli Studi di Roma "Tor Vergata", and **Vincenzo Galasso**, Bocconi University and IGER

What makes economic reforms a success or a failure? Why do we witness ambivalent attitudes to reforms? Can governments implement reforms differently, without inflicting prejudice to large fringes of the population? This book explores these issues by comparing a number of reforms across a large set of countries and sectors. It aims to help readers understand the process of reform and the origins of success, and to help reformers discover new ways to implement reforms to benefit the most people.

Homeownership and the Labour Market in Europe

Edited by **Casper van Ewijk**, CPB Netherlands Bureau for Economic Policy Analysis and University of Amsterdam, and **Michiël van Leuvensteijn**, CPB Netherlands Bureau for Economic Policy Analysis

Increasing labour market flexibility is at the top of the European agenda. A new and challenging view is that lack of mobility in the labour market may arise from rigidities in the housing market. This book brings together top European economists to analyse the interaction between housing and labour markets and provides clear policy messages.

European Migration

What Do We Know?

Klaus F. Zimmermann, Bonn University

"This is a valuable contribution to the literature on immigration"

Economic Record

In recent years, migration has become a major challenge for researchers and policy-makers. The focus has been to investigate the demographics of the movements, the assimilation and integration patterns this process causes, and the effects migrants have on the welfare of the native population. The design of a coherent migration policy is crucial for Europe, which is far behind countries in North America and Australasia. This book summarizes for the first time existing evidence in Europe and contrasts it with the experiences of those countries. It provides a complete picture of migration policies across countries and draws policy-conclusions.

Employment Regimes and the Quality of Work

Edited by **Duncan Gallie**, Nuffield College, University of Oxford

The book makes a major new contribution to the sociology of employment by comparing the quality of working life in European societies with very different institutional systems—France, Germany, Great Britain, Spain and Sweden.

Transition and Challenge

China's Population at the Beginning of the 21st Century

Edited by **Zhongwei Zhao**, The Australian National University, and **Fei Guo**, Macquarie University

With the largest population in the world, China has experienced significant demographic, social, and economic changes in recent decades. This book examines these profound changes and not only provides a comprehensive and authoritative analysis of China's demographic reality, but also looks at how China's population has altered the global landscape.
