

**BIOGRAPHY**

**Edward L. Glaeser**

Ed Glaeser is the Fred and Eleanor Glimp Professor of Economics at Harvard, where he also serves as Director of the Taubman Center for State and Local Government and the Rappaport Institute for Greater Boston. He studies the economics of cities, and has written scores on urban issues, including the growth of cities, segregation, crime, and housing markets. He has been particularly interested in the role that geographic proximity can play in creating knowledge and innovation. He received his Ph.D. from the University of Chicago in 1992 and has been at Harvard since then.

**Cities, Agglomeration, and Spatial Equilibrium**

Edward L. Glaeser, Harvard University

'Ed Glaeser has produced a definitive blueprint for the edifice of urban economics - simple insightful models with enough empirical application to demonstrate their usefulness and in just enough detail for the reader to grasp how the models can be enriched and extended to address complex issues. A towering achievement.'

John Quigley, University of California, Berkeley

Drawing on the success of his Lindahl lectures, Edward Glaeser provides a rigorous account of his research and unique thinking on cities. Using a series of simple models and economic theory, Glaeser illustrates the primary features of urban economics including the concepts of spatial equilibrium and agglomeration economies. Written for a mathematically inclined audience with an interest in urban economics and cities, the book is written to be accessible to theorists and non-theorists.

**Microeconomic Theory**

A Concise Course

James Bergin, Queen's University, Ontario

*Microeconomic Theory* provides a detailed discussion of the subject matter appearing in graduate courses in microeconomic theory. The presentation is self-contained and provides key foundational insights on each topic covered. This book will be of use to graduate students of microeconomics and more generally to those who need a brief modern account of the various areas of microeconomic theory.

**Microeconomics**

Optimization, Experiments, and Behavior

John P. Burkett, Professor of Economics, University of Rhode Island

In this book, John P. Burkett presents microeconomics as an evolving science, interacting with mathematics, psychology, and other disciplines and offering solutions to a growing range of practical problems. It gives extensive and innovative coverage of recent findings in cognitive psychology and behavioral economics. A solutions manual is available to instructors wishing to adopt the book for their courses.

**The Urban Experience**

Economics, Society, and Public Policy

Barry Bluestone, Northeastern University, Mary Huff Stevenson, University of Massachusetts at Boston, and Russell Williams, Assistant Professor

*The Urban Experience* provides a fresh approach to the study of metropolitan areas by combining economic principles, social insight, and political realities with an appreciation of public policy to understand how U.S. cities and suburbs function in the 21st century. Grounded on the premise there is a fascination about one's own surroundings, the book uses a great deal of historical and comparative data to explore the wide variation in how we experience urban and suburban communities. Students taking a one-semester course using this text will have a much greater appreciation and understanding of the American metropolis. It will also be a vital text for urban scholars, public officials, and all those interested in understanding urban dynamics.
