

International Law and the Environment

Third Edition

Patricia Birnie, formerly Visiting Fellow at the London School of Economics and Director of the International Maritime Law Institute, Alan Boyle, Professor of Public International Law at the University of Edinburgh, and Catherine Redgwell, Professor of International Law at University College London

At a time when global environmental problems have rapidly intensified and tackling climate change represents probably the greatest challenge the UN system has ever faced, *International Law and the Environment* guides readers through this increasingly complex but still developing field of international law.

Written by three of the leading academics in the field, this new edition of *International Law and the Environment* continues to provide the definitive account of the core principles of the subject. Clearly written chapters with introductions and conclusions ensure students are guided through the subject and focus on the key issues. Detailed footnotes and a thorough bibliography offer a wealth of sources for advanced study and research.

New to this edition

- Expanded coverage of the principal law-making processes and multilateral treaty regimes
- Fully updated to take account of the growing body of case law emanating from international tribunals
- Rewritten chapters on human rights and the environment, and on climate change and the Kyoto Protocol, reflecting important developments in these fields

Environmental Law

Seventh Edition

Stuart Bell, *Head of the Law School, University of York,*
and Donald McGillivray, *Senior Lecturer, Kent Law School, University of Kent*

“ It tackles subjects with a frankness that communicates the authors’ command of, and enthusiasm for, environmental law; its combination of a sophisticated evaluative narrative and accessible engaging layout is impressive.

The Law Teacher ”

Environmental Law addresses a wide range of topics, introducing students to all the key areas of environmental law, drawing on legislation, policy, and practice. It includes updated coverage of all aspects of environmental law, reflecting changes to legislation and case law that have occurred since the previous edition.

Subjects are fully cross-referenced, allowing readers to follow key ideas through the book and to understand the interaction of law and the environment. The book is structured by theme and by sector, and locates environmental law within its wider policy context. Each chapter is structured around a range of learning features including key objectives, case studies, summaries, questions, and further reading lists which are presented in an innovative colour design, guiding the student clearly through the topic.
