

Encyclopedia of Evolution

Editor in Chief:
Mark Pagel
University of
Reading

- ◆ **A huge reference resource on the exciting field of evolutionary biology**
- ◆ **370 original articles written by a team of international scholars**

'A key source for researchers, as well as for students and teachers...this is likely to be one of the most widely plagiarized books in the history of evolutionary biology.'

Nature

This is a comprehensive, accessible, and authoritative guide to what we know about evolutionary biology, from the origins of species to the selfish gene and beyond.

The *Encyclopedia of Evolution* covers the essentials of evolutionary biology written by leading experts, including Stephen Jay Gould on Macroevolution and Jane Goodall and Elizabeth Vinson-Lonsdorf on Culture in Chimpanzees. The articles cover basic concepts and theories; models, methods, and findings; schools of thought; current controversies; biographies; and more. It encompasses evolutionary thought in genetics, animal behaviour, and every area of the life sciences, as well as in anthropology, psychology, linguistics, sociology, economics, medicine, philosophy, and other fields.
