

# International Encyclopedia of Linguistics

Editor:  
**William J. Frawley**  
The George Washington  
University

- ◆ Over 900 articles by more than 600 international scholars
- ◆ 100 new articles and exhaustive revision of existing articles for this new edition

**'This is an excellent work...the very best in the field.'**

Linguistics

**'All the contributors are top-rankers... I can't imagine any encyclopedia being more successful in presenting expert opinion across such a wide spectrum of knowledge.'**

Richard Hudson,  
Journal of the US  
Linguistics Society

The second edition of the *International Encyclopedia of Linguistics* encompasses the full range of the contemporary field of linguistics. Entries of up to four thousand words survey the major fields of study, while shorter entries treat specific topics, define and discuss technical terms, and provide sketches of the careers of important scholars in the history of linguistics. A major emphasis of the work is its extensive coverage of languages from all corners of the world. Language lists attached to each article on a language group or family enumerate all languages, extinct or still spoken, and provide detailed information on the number of known speakers, geographical range, and degree of intelligibility with other languages in the group.

Each article in the *Encyclopedia* is supported by up-to-date bibliographies, and is readily accessible via a system of cross-references, a detailed index, and synoptic outline.

Line drawings, maps, tables, and diagrams are generously employed to illustrate the text of many articles.

**How to order:** Please order from your library supplier or Oxford University Press.
