Features of all living things

① The processes of life

The diagram below shows the life processes carried out by all living things. Make notes on each process in the boxes. Include the following words:

Feed	Move	Excrete	Reproduce	Sense	Grow	Respire
energy	predator	waste	new	surroundings	bacteria	cell
photosynthesis	food	carbon dioxide	generation	respond	divide	processes
		remove	die	sunlight	billions of cells	chemical reactions
						food energy release
