be ..... using other energy sources.

b Draw lines to join the correct boxes to match:

- the type of fuel to the statement about the fuel
- the statement about the fuel to the example of the fuel.

One has been done for you.

Fuel	Statement	Example
biofuel	does not make carbon dioxide	coal
fossil	material that was living recently	uranium
nuclear	made over millions of years from decayed plant or animal remains	sugar

*Note: A line is drawn from 'nuclear' to 'made over millions of years from decayed plant or animal remains'.*
